## ABOUT US

MidyaTech incorporated in Hewler, Kurdistan Region, Iraq. We have operated our firm since January 2004. MidyaTech is a leading Hosting, Web design and Application development firm whose founders have extensive experience and expertise in the information technology, telecommunications and internet solutions throughout Kurdistan Region and Iraq. MidyaTech registered as a specialized information technology solutions company in 2007.

MidyaTech team comprises highly-qualified technical staff. Their skills cover all aspects required to provide integrated information technology solutions. In addition to that, the management team has extensive experience in the IT field.

MidyaTech offers comprehensive solutions for business commerce by providing expert analysis and solutions with Internet strategies, tools, designs and services to give your business sustained visibility online, all the time.

Basically, we think of ourselves as real people doing really nice work at a fair price to give businesses a competitive advantage in a complex and rapidly changing Internet. Focusing all the efforts to satisfy client's demands, MidyaTech has a wide offer of hardware and software solutions for government ministries/offices, universities, schools, small, medium and large companies, NGOs and individual users, including workstations and servers, computer networks and telecommunication systems.

## MIDYATECH SOLUTIONS

Our professional team at MidyaTech utilizes the best new technologies to build significantly tailored solutions meet the utmost clients' business requirements, helping them to secure a competitive edge in an increasingly changing global market. We rely on the clients' success through our solutions as the measure of our own success.

MidyaTech offers pre-sale and after-sale support, service and maintenance, consulting, integration and turn-on key IT solutions, over different PC platforms, alone or in cooperation with other major software and hardware Variants.

MidyaTech is able to offer the following services and solutions:

- Hosting and Domain Registration
- Web Design
- Application Development
- SMS2TV and IVR Services
- Networking and Communication
- IT Consultancy

#### 📌 HOSTING AND DOMAIN REGISTRATION

Our hosting services are supported by fully redundant environmental and power systems. A trusted provider and be recognized with reliability by users. MidyaTech provides 24/7 acting hosting servers you wish to host in a cost effective manner. Our clients will be satisfied with our support and backup system in addition to the important features which we provide with our hosting packages. Also MidyaTech provides domain registration services.

#### 📌 WEB DESIGN

MidyaTech develops attractive web sites with high levels of interactivity to benefit customers. Similarly, able to develop fully interactive portals carefully targeted to end-users' needs, which can assist them in using the power of the Internet to achieve required goals.

#### 📌 APPLICATION DEVELOPMENT

MidyaTech has qualified expert staff for application development to meet customers' needs for project management and business administration. MidyaTech uses most recent technologies in both web and local environment procedures in executing these projects and has assigned IT Manager to oversee the entire project from start to finish. Our engineering and customer support resources are ready and eager to help the customer to complete all projects quickly and efficiently, with the highest customer satisfaction possible.

#### 📌 SMS2TV and IVR SERVICES

MidyaTech recently started providing SMS2TV services for satellite tv channels. Services include SMS chat, telematch games and voting. Also MidyaTech offers voice portal solution using Interactive Voice Response Technology (IVR) through a touch-tone telephone to interact with a database to acquire information from or enter data into the database. Customers can receive up-to-date account information instantly and easily without having to speak directly to a person. IVR technology is also used to gather information, as in the case of telephone surveys or matches in which the user is prompted to answer questions by pushing the numbers on a touch-tone telephone.

#### 📌 NETWORKING AND COMMUNICATION

Our management team and engineering staff have over 15 years of combined experience in the networking and communication field and combined presence in the regional market to manage resources that demand flexibility, reliability, performance and security. MidyaTech has the exact and necessary expertise in all the aspects of networks and telecommunication, from wired and wireless LAN, PC server setup and administration, training, and customer support alone or in cooperation with other specialized local or international companies.

### IT CONSULTANCY

MidyaTech utilizes the best new technologies to build significantly tailored solutions meet the utmost clients' business requirements, helping them to secure a competitive edge in an increasingly changing global market. We rely on the clients' success through our solutions as the measure of our own success. Our team has experience of access to a comprehensive range of sources to answer enquiries including: published reports, directories and the general and Internet sources; libraries and information services; associations and industry bodies; personal contacts with industry experts and analysts.

MidyaTech activities for management consultants typically involve:

- Identifying and investigating problems concerned with strategy, policy, markets, organization and processes;
- Assembling and analyzing all available data;
- Ensuring the client receives the assistance needed to implement the recommendations.
